The Prepaid Plan is easy to understand as it will simply save you 10% on green and cart fees as long as you have a balance on your account. A minimum deposit of \$100 is required.

To understand if either of the Package Plans would be a benefit to your family, you will have to make calculations based on how many rounds of golf you play, whether you have your own cart, if your spouse also plays and if you use the driving range. The driving range option alone could save you from \$325 to \$450 per year.
